

# The #1 workforce planning tool built for construction

**Bridgit Bench** helps general contractors consolidate their project and workforce data into one easy-to-use, collaborative platform.

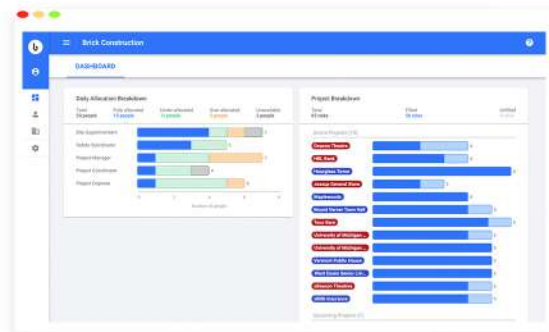

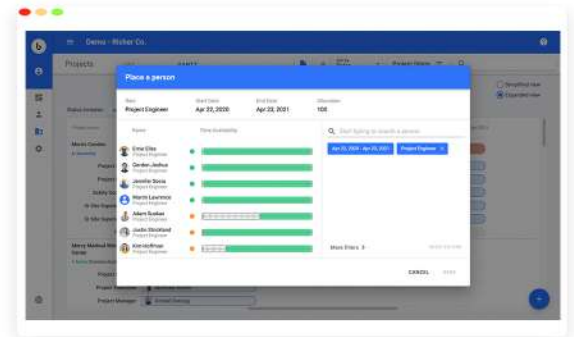

## Streamlined workforce planning

- Holistic view of current and past projects, overlapping workload issues, and all relevant data for every employee
- Identify over and under allocated staff, and who is available for new or future projects
- Custom project and people fields allow you to track different divisions, work experience, certifications, and more

## Easy project allocations

- All of your projects and related scheduling conflicts
- Create custom allocations based on labor requirements, assign people based on availability, and look ahead at future staffing needs
- See the impact on your team when a project date slips

## Dynamic dashboard

- Breakdowns of entire team allocations, resourcing statuses of current and upcoming projects, and the ability to look ahead at all unfilled projects roles
- Gain insight into workforce utilization to optimize your workforce plan

**“When we walk out of the workforce planning meeting with Bridgit Bench, everyone is clear on what is happening. The information gets put into Bridgit Bench – it’s the gospel – and we act on it that day.”**

— MIKE DENNIS, OPERATIONS MANAGER @ GE JOHNSON
