BRIDGIT BENCH   SPREADSHEETS

Manage people, not spreadsheets

"We used an Excel spreadsheet to manage our resources, which took a lot of time and didn't give us the ability to forecast out very far. It was really cumbersome, it took longer to do, and you're not working with a live document all the time. If something changes, the spreadsheet has to be updated. If you're remote, it becomes difficult."

Daniel Barry, VP of Operations @ Schimenti

| BENEFITS	Bridgit	SPREADSHEETS
Collaborate with the rest of the organization on the cloud	✓	✓
CIO-approved, layered cloud-based security and encryption	✓	✓
Built specifically for general contractors	✓	✗
Visibility into your entire workforce, what jobs they're on today, and where they'll be next	✓	✗
Built-in forecasting charts that show you workforce capacity vs. demand and workforce utilization rates	✓	✗
Avoid the precon crunch and know roles to hire for and when	✓	✗
Tracking pursuit projects and penciling in the best team, even before winning the bid	✓	✗
Works on your mobile phone so you can see your both in the office and in the field	✓	✗

White glove customer service

"Bridgit Bench checked all the boxes for me and what I needed. Extremely intuitive. Customer service was excellent and didn't feel I was getting the high pressure sales pitch. The folks I worked with seemed genuinely interested in solving a problem, not selling software. I only wish I had the software writing acumen to develop this first!!!"

Chris Lang, VP of Operations @ Fisher

BENEFITS	Bridgit	SPREADSHEETS
Regular check-ins to fine tune your workforce planning and ensure you're getting the most out of the platform	✓	✕
On-demand training resources and support	✓	✓
Dedicated implementation specialists for easy onboarding	✓	✕
Dedicated integrations specialist for custom integrations	✓	✕

Aug 2022
True Utilization Rate

Awarded + Pursuit   73.9%
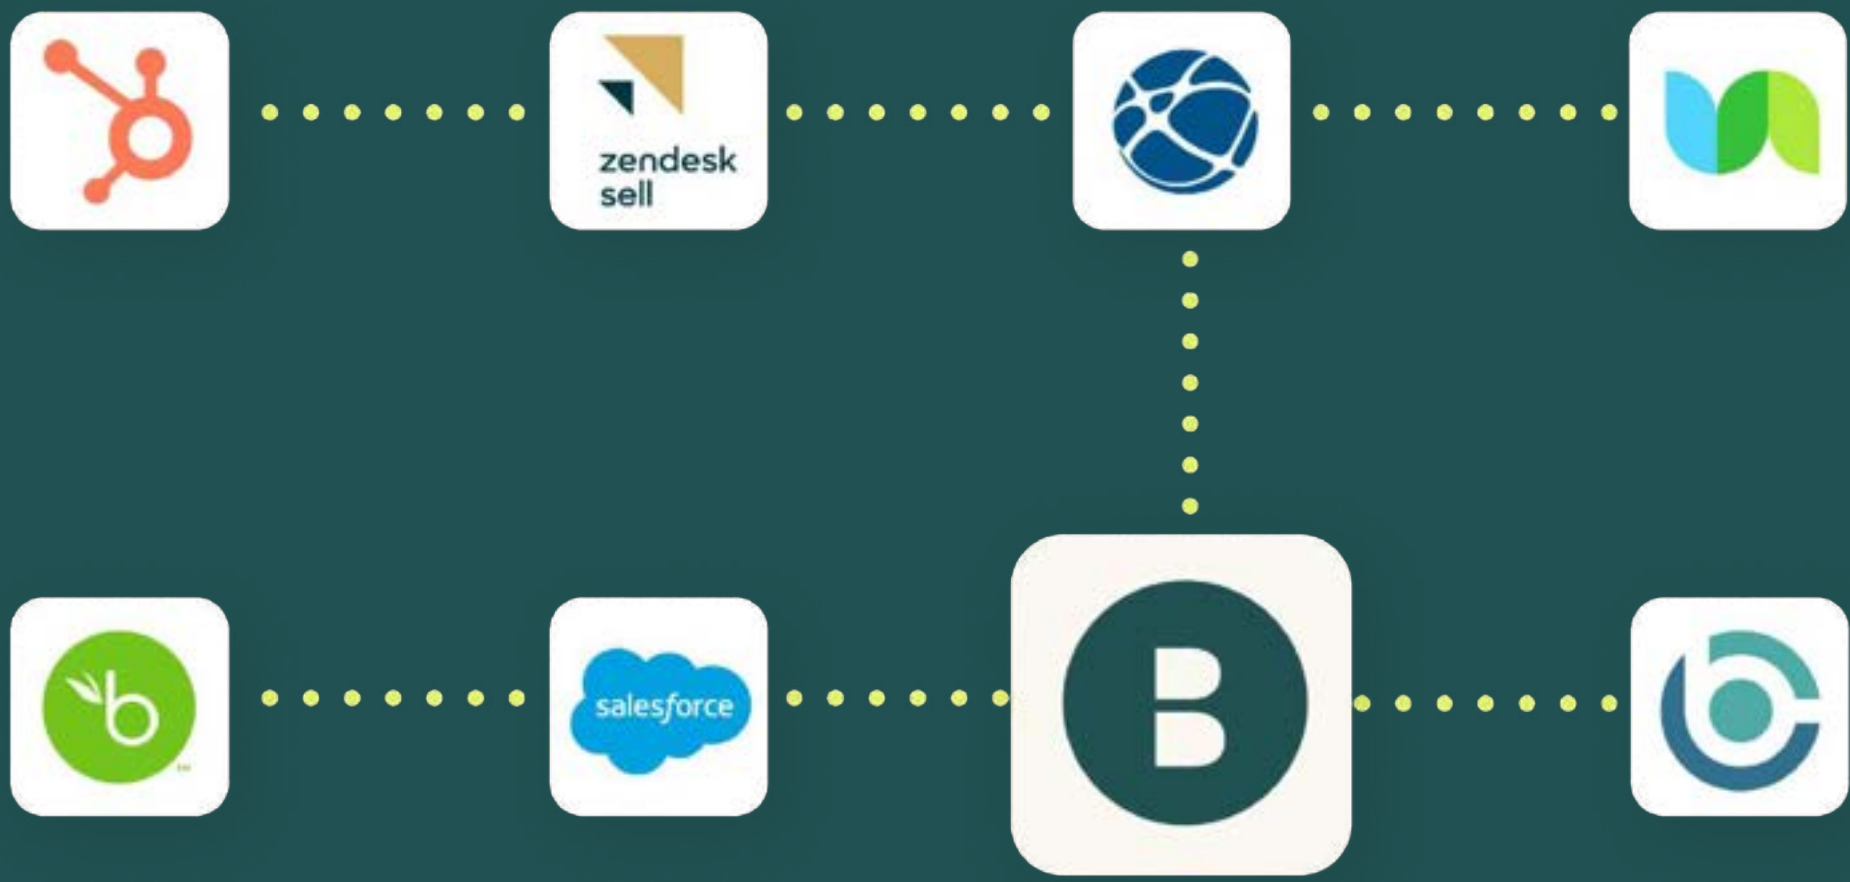

Awarded   66.4%

Get intelligent insights into your people and projects

"Overall, Bridgit is a huge upgrade from our Excel resource tracking spreadsheets. It is easy to use, and the mobile application makes it easy to see project information and people assignments on the go. The Gantt chart is also a great visual tool to help understand where resources are deployed and for how long."

Brian Harry, Project Executive @ Russell

BENEFITS	Bridgit	SPREADSHEETS
Reduce the chance of cost overruns by tracking your team's bench cost	✓	✗
See how far (in miles/KM) your team members live from various projects instantly	✓	✗
Ability to instantly add all the roles you need for a project, instead of adding them one by one	✓	✗
See the availability and key info of your people to help you place someone on a role	✓	✗
Smart role suggestions based on project history help you pick the best person for the job	✓	✗
Forecast staffing needs for future project bids	✓	✗
Run scenarios with project bids to see how they impact your workforce	✓	✗

Reduce data errors by connecting your entire tech stack

"[The old process] was probably my biggest complaint. Our software stack is mostly siloed information, which also leads to double, triple, sometimes quadruple data input."

Scott Kramer, President & CEO @ Spartan
